the Election Commission of India pertaining to the roles and responsibilities of the Police, and utilises the power of Machine Learning to provide prompt and accurate responses to user inquiries by referencing these authentic sources.

'Election Mitra' is readily accessible by scanning a QR Code, which has been distributed throughout the rank and file of Andaman & Nicobar Police and the Central Armed Force (CAPF) who have been deployed for election duties in the Islands.

Another technological initiative that has been launched, is the Geotagging and Colour Coding of all Polling Stations, vulnerable pockets, locations of repeat offenders and History sheeters, and other useful/relevant information etc. These geotagged maps not only provide a ready reference and area familiarization for the CAPFs, Police personnel but are also of immense help in planning the Area Domination and other checking activities, thereby enhancing the efficiency and effectiveness of these exercises. These geotagged maps are available on the platform of Google Maps and have been made available through scanning of QR Code to all the field Police personnel and CAPFs deployed for election duties.

The launch of these initiatives underscores Andaman and Nicobar Police's unwavering commitment in embracing innovation and leveraging technology to deliver on its mission of ensuring a free, fair and peaceful Elections in the Andaman and Nicobar Islands.

ECI introduces 'Myth vs Reality Register' to proactively combat mis-information in General Elections 2024

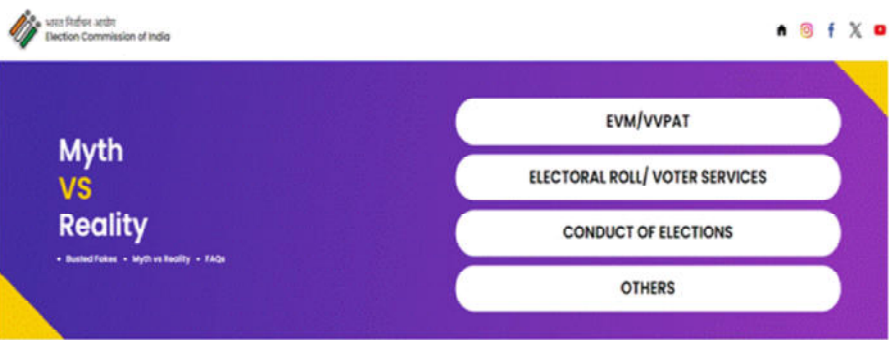

One-stop platform for credible and authenticated election related information in an easy-to-access format at the click of a button

New Delhi, Apr. 2 (PIB)

To combat the spread of misinformation and uphold the integrity of the electoral process, the Election Commission of India (ECI) today launched a 'Myth vs Reality Register' as part of the ongoing General Elections 2024. It was launched today by Chief Election Commissioner, Shri Rajiv Kumar along with Election Commissioners, Shri Gyanesh Kumar and Shri Sukhbir Singh Sandhu at Nirvachan Sadan, New Delhi. The 'Myth vs Reality Register' is accessible to the public through the Election Commission's official website (<https://mythvsreality.eci.gov.in/>). The Register will be continuously updated regularly to include the latest busted fakes and fresh FAQs. The introduction of the 'Myth vs Reality Register' marks a significant milestone in the ECI's ongoing efforts to safeguard the electoral process from misinformation. The Chief Election Commissioner, Shri Rajiv Kumar during the press conference on announcement of schedule for General Elections 2024 has identified misinformation as one of the challenges along with money, muscle and MCC violations for electoral integrity. With the proliferation of misinformation and false narratives becoming a growing concern in many democracies globally, this innovative and proactive initiative by ECI is an effort to ensure that voters have access to

accurate and verified information throughout the electoral process.

The 'Myth vs Reality Register' serves as a comprehensive repository of factual information to dispel myths and falsehoods circulating during the election period, thereby empowering them to make informed decisions. It has been designed in a user-friendly format broadly covering areas of myths and misinformation around EVM/VVPAT, Electoral Roll/Voter Services, Conduct of Elections and others. This

register provides already busted election related fake information, probable myths circulating around on social media platforms, FAQs on important topics and reference material under different sections for all stakeholders. The register will be updated on a regular basis.

All stakeholders have been encouraged to verify and corroborate any dubious information received by them through any channel with the information provided in the Myth vs. Reality register. The platform can be used to verify information, prevent the spread of misinformation, debunk myths, and stay informed about key issues during the General Elections 2024. Users can also share the information on different social media platforms from the register.
