ANPCC urges general public & industrial stakeholders to responsibly manage and dispose of waste generated in domestic and industrial setups

Sri Vijaya Puram, Dec. 24

The Andaman and Nicobar Pollution Control Committee (ANPCC), Department of Science and Technology, Andaman and Nicobar Administration has urged the general public and industrial stakeholders to responsibly manage and dispose of waste generated in domestic and industrial setups in accordance with the Municipal Solid Waste Management Rules, 2016. Effective waste management is critical to maintaining the

pristine environment of the Andaman and Nicobar Islands and ensuring the health and well-being of the community.

For domestic setups, residents have been requested to segregate waste at the source and hand over to the Municipal authorities for proper processing and disposal. Industries operating in the region have been mandated to follow best practices for waste management by implementing waste segregation, recycling and safe disposal protocols. All industrial

units must ensure compliance with environmental regulations, including obtaining necessary consents from ANPCC for waste generation and treatment. Hazardous industrial waste should be disposed of through authorized agencies and untreated waste water must not be discharged into the environment. Industries have also been encouraged to adopt cleaner technologies and reduce waste generation at the source. The public have been

urged to avoid open dumping and burning of waste, as these practices can lead to air, water and soil pollution.

In light of the growing concern regarding cigarette and bidi butt litter, ANPCC also highlights the importance of their proper disposal. Cigarette and bidi butts, though small in size, pose a significant environmental threat due to their non-biodegradable components and toxic chemicals. Local authorities have been
