20-year-old legacy issue of similar ...

(Contd. from page 1)  
verification, it was found that holders of such similar EPIC numbers were genuine electors in different assembly constituencies and different polling stations. All such electors have since been issued new EPIC cards with new numbers. The genesis of the issue has been traced from 2005, when various States/UTs were using Assembly Constituency-wise different alphanumeric series in a decentralised manner. These series had to be changed again in 2008, after delimitation of the constituencies. During this period, some ACs erroneously continued to use either the old series or because of typographic errors they used the series allotted to some other constituencies.  
Every voter's name is in the electoral roll of the polling station, where he/ she is an ordinary resident. Having had an EPIC of similar number never enabled any such person to vote at any other polling station. Thus, the issue of a similar EPIC could not have impacted the results of any elections.
