(Contd. from page 1)

Andaman and Nicobar Pollution Control Committee (ANPCC) is carrying out the short term monitoring of Ambient Air and Noise levels for the upcoming Deepawali festival. The monitoring program aligns with the protocol of the Central Pollution Control Board, New Delhi.

The ANPCC has installed three monitoring stations at Aberdeen Bazaar, Dollygunj and Chouldari area. These stations have been made operational for 15 days, commencing from 7 days prior to Diwali (starting from 13th October 2025) and concluding 7 days after Diwali (ending on 27th October 2025). The parameters to be closely monitored include Sulfur Dioxide (SO₂), Nitrogen Dioxide (NO₂), Particulate Matter 10 (PM₁₀), Particulate Matter 2.5 (PM_{2.5}), metals such as Lead (Pb), Nickel (Ni), and Arsenic (As) in PM₁₀, as well as selected metals/elements like Aluminum (Al), Barium (Ba), and Iron (Fe) in PM_{2.5}. Additionally, noise levels will be continuously monitored on both pre-Deepawali and Deepawali days.

This year, Deepawali falls on Oct. 20 and ANPCC's monitoring program has been started from 13th October, 2025 and will continue up to Oct. 27, ensuring data collection during the crucial 7 days before and after the Diwali festival.

The Ambient Air Quality is assessed through the Air Quality Index (AQI), which classifies air quality into six categories ranging from Good to Severe, helping citizens understand pollution severity and its health implications

AQI	Possible Health Impacts
Good (0-50)	Minimal impact
Satisfactory (51-100)	Minor breathing discomfort to sensitive people
Moderate (101-200)	Breathing discomfort to the people with lung, asthma and heart disease.
Poor (201-300)	Breathing discomfort to most people on prolonged exposure.
Very Poor (301-400)	Respiratory illness on prolonged exposure
Severe (> 400)	Affects healthy people and seriously impacts those with existing diseases.

Based on the data recorded during the monitoring period, the AQI will be computed for each location. In the previous year (2024), the AQI was assessed as "Satisfactory" at both Aberdeen Bazaar and Dollygunj monitoring stations.

The ANPCC continues its dedicated efforts to maintain and improve air and noise quality during the festive season, ensuring a safe, clean, and healthy environment for the residents of the Andaman and Nicobar Islands, a press release from ANPCC said.
