FSSAI alerts fruit traders to ensure compliance with prohibition of Calcium Carbide in fruit ripening

New Delhi, May 19 (PIB)

The Food Safety and Standards Authority of India (FSSAI) has alerted traders/fruits handlers/Food Business Operators (FBOs) operating ripening chambers to strictly ensure compliance with the prohibition on Calcium Carbide for artificial ripening of fruits, particularly during the mango season. FSSAI is also advising Food Safety Departments of States/UTs to remain vigilant and take serious action and deal stringently against person(s) indulging in such unlawful practices as per the provisions of FSS Act, 2006 and Rules/Regulations made thereunder.

Calcium Carbide, commonly used for ripening fruits like mangoes, releases acetylene gas which contains harmful traces of arsenic and phosphorus. These substances, also known as 'Masala', can cause serious health issues such as dizziness, frequent thirst, irritation, weakness, difficulty in swallowing, vomiting and skin ulcers, etc. Additionally, acetylene gas is equally hazardous to those handling it. There are chances that Calcium Carbide may come in direct contact with fruits during application and leave residues of arsenic and phosphorus on fruits.

Due to these dangers, the use of Calcium Carbide for ripening fruits has been banned under Regulation 2.3.5 of the Food Safety and Standards (Prohibition and Restrictions on Sales) Regulations, 2011.

A&N Police issues public advisory on fraudsters sending fake job offer SMSs to perpetrate Cyber Crime

Port Blair, May 19

A new trend in financial cyber fraud has been observed where fraudsters send fake job offer SMSs to perpetrate Cyber Crime. Fraudsters place online advertisements claiming that they can give jobs where one can make large amount of money working from home with little time and effort. A job scam occurs when a fraudster poses as an employer or recruiter, and offers attractive

employment opportunities, which require job seekers to pay some money in advance. The SMSs sent by fraudsters offer high-paying part-time jobs to siphon off victims' money and their personal information.

In this regard, Andaman and Nicobar Police has issued the following advisory to safeguard the citizens:

◆ Avoid tempting job offers sent via text messages or emails by unknown senders.

◆ Scrutinize the job offering company online (use words like 'scam', 'fraud' or 'complaint' with company name to online search & verify if similar scams are happening).

◆ Avoid making any payment without authenticating the employer for registration or other purposes.

◆ Secureitize the SMS-Headers to confirm the authenticity of a job offer.

FSSAI alerts fruit traders to ensure compliance...

(Contd. from page 1)

This regulation explicitly states, "No person shall sell or offer or expose for sale or have in his premises for the purpose of sale under any description, fruits which have been artificially ripened by use of acetylene gas, commonly known as carbide gas."

Considering the issue of rampant use of banned Calcium Carbide, FSSAI has permitted the use of ethylene gas as a safer alternative for fruit ripening in India. Ethylene gas can be used at concentrations up to 100 ppm (100 ?l/L), depending upon the crop, variety and maturity. Ethylene, a naturally occurring hormone in fruits, regulates the ripening process by initiating and controlling a series of chemical and biochemical activities. The treatment of unripe fruits with ethylene gas triggers the natural ripening process until the fruit itself starts producing ethylene in substantial quantities.

Further, the Central Insecticides Board and Registration Committee (CIB & RC) has approved Ethephon 39% SL for the uniform ripening of mangoes and other fruits.

FSSAI has published a comprehensive guidance document titled "Artificial Ripening of Fruits - Ethylene gas a safe fruit ripener" ([https://www.fssai.gov.in/upload/uploadfiles/files/Guidance\\_Note\\_Ver2\\_Artificial\\_Ripening\\_Fruits\\_03\\_01\\_2019\\_Revised\\_10\\_02\\_2020.pdf](https://www.fssai.gov.in/upload/uploadfiles/files/Guidance_Note_Ver2_Artificial_Ripening_Fruits_03_01_2019_Revised_10_02_2020.pdf)) suggesting the Food Business Operators to follow the procedure for artificial ripening of fruits. This document outlines a Standard Operating Procedure (SOP) incorporating all aspects of artificial ripening of fruits by ethylene gas viz. Restrictions, Requirements for Ethylene Ripening System/Chamber, handling conditions, Sources of Ethylene Gas, Protocol for application of Ethylene gas from various sources, post treatment operations, safety guidelines etc.

In case any use of Calcium Carbide or any wrong practice of using ripening agents for artificial ripening of fruits is noticed by the consumers, the same may be brought to the notice of concerned State Commissioners of Food Safety for taking action against such violators. The details of the Commissioners of Food Safety of all States/UTs are available on the below-mentioned link: <https://www.fssai.gov.in/cms/commissioners-of-food-safety.php>.
